

WCP-81

Met-L-Chek® WCP-81 is a specially formulated, fast drying white contrast paint that is used to create a consistent background on the component surface to increase contrast for fine flaw detection with the black visible particles in Met-L-Chek® MPI-80 and Met-L-Chek® MPI-80P. Met-L-Chek® MPI-80 is a premixed, ready-to-use, visible black magnetic particle bath designed for high sensitivity visible magnetic particle inspection.

When dry, the white contrast paint is resistant to the wet method baths used for inspection but is easily removed from the demagnetized component surface with a solvent cleaner such as Met-L-Chek® R-504.

NDT Classification

- White Contrast Coating
- Method: Dry & Wet

Available Sizes

- Aerosol – 12 X 16 oz (400 mL)
- 5 Gallon (18.9 L)

NSN Information

- No NSN Numbers

Specifications

- ASME B&PVC Sec V
- ASTM E-1444
- ASTM E-709
- ISO 9934-2

Typical Physical Properties

Form	White paint
-------------	-------------
